Instabean Hot Beverages Instant Powder:

Measuring of powders: The bulk density of the freezo & latte powders differ, depending on the individual ingredients particle size and shape. Some powders are more compact, and others fluffier. It is therefore important to adhere to the number of scoops required per serving as the mass per volume of the flavour variants differ per scoop.

Tips & Tricks

Always use **level scoops** of powder
when preparing the beverages
to ensure repeat standardization
of flavour experiences.

•
Customise your freezo drinks
with a dash of Nettari syrup.

•
Store powders in an
airtight container
for maximum shelf life.

•
Powders can be used to flavour
Milkshakes (ice cream based or similar),
simply add 2 x 15ml scoops.
